Experience

Senior Software Engineer May 2025 – Jul 2026
EasyA Limited *Remote*

- Owned end-to-end mobile development of the EasyA app (iOS & Android) using Flutter/Dart and Firebase, including architecture decisions, releases, and CI/CD pipelines with fastlane.
- Built the daily streak feature end-to-end – including the streak tracking system across iOS and Android, a native iOS home screen widget (WidgetKit, App Groups, fastlane match) and an Android home screen widget, both updating in real time.
- Added deep linking to the app, enabling seamless navigation from external URLs to specific in-app content across iOS and Android.
- Built a referral system allowing users to invite friends, track referral status, and unlock rewards – integrated with Firebase Auth and Firestore.
- Integrated blockchain smart contract deployment flows into the app for Algorand and Flare, enabling users to deploy and interact with contracts directly from their mobile device.
- Developed and maintained Firebase Cloud Functions (TypeScript) serving as the app backend – handling real-time data processing, scheduled jobs, push notifications, and third-party API integrations.
- Maintained and extended content and integrations across 30+ blockchain ecosystems including Algorand, Flare, XRP, and Stellar.

Senior Flutter Developer Jul 2023 – May 2025
Attraxia *Remote*

- Built BLE (Bluetooth Low Energy) device integration to extract sensor data, generate movement risk reports, and ship OTA firmware updates from within the app.
- Implemented internationalisation, a ticket reporting system, a shake-to-report feedback mechanism, and UI performance optimisations reducing delays throughout the app.

Flutter Developer Jan 2023 – Apr 2023
Mactabbi.com *Freelance, Annaba*

- Built a full coworking space booking app from scratch with map-based search, date/time booking, a points system, and a dynamic QR code access flow (rotating every few seconds) with a companion host scanner app.

Flutter Developer Feb 2022 – Jul 2022
Miit.co *Remote*

- Implemented offline-first caching and retry strategies, real-time location tracking, and Google Maps with custom markers.

Flutter Developer Intern Jun 2021 – Sep 2021
dztenders.com *Annaba, Algeria*

- Built internationalisation features, a reusable component library, and advanced search filters.

Projects

Adoptini | *Flutter, Firebase, Google Maps* Personal Project

- Pet adoption platform with real-time in-app messaging, map-based pet search, geolocation-aware listings, Firebase Auth/Storage, and multilingual support (Arabic, French, English).

IDCardConnect | *Flutter, Firebase, NFC* Personal Project

- Algerian ID card reader using NFC – extracts card data and persists it securely to Firebase with full authentication flow.

Technical Skills

Mobile: Flutter/Dart, iOS (WidgetKit, Swift basics), Android, BLE, fastlane
Backend & Cloud: Firebase (Firestore, Auth, Cloud Functions, Storage), Next.js, Supabase, GCP
Web: React, TypeScript, Tailwind CSS, Vercel
Blockchain: Algorand, Flare, XRP, Stellar, Solana
Tools: Git, GitHub, CI/CD, Firebase CLI, REST/GraphQL
Languages: English (professional), Arabic (native), French (conversational)

Education

Bachelor's in Computer Science Sep 2020 – Jun 2023
Badji Mokhtar University *Annaba, Algeria*
